Candace Fox Camarillo

Interactive Developer

503.267.2353
candace.fox.camarillo@gmail.com

Experience

Owen Jones & Partners

Senior Developer
November 2013 - present
Technical lead and developer on a variety of interactive projects, including mobile-friendly websites, web applications and CMS integrations.

CMD Agency

Senior Software Developer, Interactive Developer
November, 2011 - 2013
Lead and team developer for custom full-stack web applications, mobile applications, microsites and email campaigns. Working with front-end and back-end technologies such as Zend, Backbone.js, Twitter Bootstrap, and MySQL.

Candace Lapp Design, LLC

Sole Proprietor
June 2006 - November 2011
Working directly with clients, I designed and developed projects ranging from business cards to full-stack web applications, motion graphics, and Flash applications.

Chamber Music Northwest

Interactive Media Designer / Developer
April 2005 - July 2006
Designed, developed, and maintained this non-profit music organization's data-driven website. Worked with multiple stakeholders to produce a LAMP-stack application that housed artist profiles, concert schedules, music clips, a blog, and venue information.

University of Oregon Department of Public Safety

Webmaster / User Support Assistant
October 1999 - December 2001
Designed, developed, and maintained this campus security department's website using front-end technologies. Provided IT assistance and user support for the department's computer systems.

Education

The Art Institute of Portland

BS, Multimedia and Web Design
Graduated with Honors and Class Speaker
2002 - 2006

University of Oregon School of Music

Violin Performance Program
1998 - 2001

I create well-crafted solutions using modern web technologies. I am collaborative, process-oriented, detail-oriented, and patient. I make a great cheerleader and team player.

I speak in plain English to help bring understanding of technical solutions to clients and stakeholders.

I want to contribute positively to the world with my skills, so I care about my projects' subject matter and the missions of my clients.

Skills

LAMP stack web application development
MVC-style development paradigms
Object-oriented programming
API development and integration
Functional specification
Technical Writing
Responsive design
